

Case Study

Industrial Energy Efficiency

Sector:	<input checked="" type="checkbox"/> Industry	<input type="checkbox"/> Large Buildings	<input type="checkbox"/> Infraestruturas	<input type="checkbox"/> Small buildings / residential
Subsector:	Industry Support Technological Institute			Year: 2014
Client:	GOIC (Gulf Organization for Industrial Consultants)		Implementation (months):	1
Location:	Doha, Qatar		Performance Contract (years):	N/A
Type of Contract:	Training in Industrial Energy Efficiency			

Project description:

GOIC (Gulf Organization for Industrial Consultants) is a technology institute, setup by the Gulf States (Qatar, Saudi Arabia, Oman, Kuwait, Bahrein and Yemen).

GOIC supports industries in the region, with consulting services and, among others, promoting conferences and training events in several areas.

EWEN was invited to collaborate in a training session, on industrial energy efficiency. This training session was given to representants of industries from several sectors and countries in the region.

Apart from presenting EWEN's own methodology for improving industrial energy efficiency, several real case-studies were presented and discussed.

A real-time demonstration was also done, of EWEN's e+Monitor system for remote monitoring and energy management.

Project results:

Not applicable.
